

12V/24V Heavy-Duty Solenoid Switch

This heavy-duty solenoid is designed for use in 12V and 24V electrical systems. It features a robust construction with a metal housing and bracket for secure mounting.

Product Overview

Heavy-Duty Solenoid Switch

This heavy-duty solenoid switch is engineered for reliable performance in both 12V and 24V electrical systems. Designed for industrial and automotive applications, it features a robust metal housing and an integrated mounting bracket for secure installation. With its clearly marked terminals, this component ensures straightforward integration into demanding electrical circuits.

Electrical Specifications

Voltage Compatibility	12V, 24V
-----------------------	----------

Design & Construction

Housing Material	Metal
Mounting	Yes
Terminal Marking	Positive (+) Terminal Marked
