

12x10 Off-Road Vehicle Chassis

This specialized off-road vehicle chassis is designed for heavy-duty applications in challenging terrains. The robust 12x10 wheel configuration provides exceptional stability and traction.

Overview

Heavy-Duty Off-Road Performance

The 12x10 off-road vehicle chassis is a specialized platform engineered for the most demanding operational environments. Featuring a robust 12x10 wheel configuration, it provides exceptional stability and traction for heavy-duty applications. This chassis is specifically designed to support significant loads in sectors such as oil drilling, mining, and large-scale construction.

Technical Specifications

Key Performance Systems

- Advanced suspension system
- High-precision steering system
- Reinforced structural frame

Operational Benefits

High Load Capacity • Superior Traction • Enhanced Maneuverability • Environmental Durability

Wheel Configuration

12x10

Primary Applications

Oil Drilling, Mining, Construction
