Overview

High-Performance Gasoline Engine

This 13 HP gasoline engine is a robust and reliable power source designed for demanding professional applications. Engineered for efficiency, it features a direct injection system that optimizes combustion and minimizes fuel consumption. Its compact design and durable construction ensure a long operational life, making it an ideal choice for generators, water pumps, and heavy-duty equipment.

Technical Specifications

Maximum Output

13 HP

Horsepower

3600 rpm

Rated Speed

Displacement	389 cc
Noise Level	90 dBA
Model Number	UP188 13.0

Features

Key Features

- Compact design for versatile installation
- Direct injection system for superior combustion efficiency
- High-performance air-filtering structure
- Optimized fuel and engine structure for environmental impact reduction

Service & Manufacturing

Service Capabilities	OEM, ODM
Standard Lead Time	35 days
