

13 Tooth Simplex Taper Sprocket for 3/4 Inch Pitch Chain

This 13 tooth simplex taper sprocket is designed for use with 3/4 inch pitch chains. The taper design facilitates easy installation and removal.

Product Overview

Industrial Simplex Taper Sprocket

This 13-tooth simplex taper sprocket is engineered for precision and reliability in mechanical power transmission systems. Designed specifically to accommodate 3/4 inch pitch chains, it features a taper lock design that simplifies installation and removal processes, effectively reducing maintenance downtime. Built from durable materials, this component is optimized for consistent performance in demanding industrial environments.

Technical Specifications

Tooth Count	13
Chain Pitch	3/4 inch
Sprocket Type	Simplex Taper
Standard Designation	12B

Key Features

Design Benefits

- Taper design for easy installation
- Simplified removal process
- Reduced maintenance downtime
- Durable construction for industrial use

Product Markings	HXPT
