Product Overview

High-Performance Thermal Work Gloves

These work gloves feature a dual-layer construction with a 13-gauge knit shell and a 10-gauge brushed acrylic liner, specifically designed to provide warmth and insulation in cold environments. The eco-latex diamond palm coating ensures superior grip in both wet and dry conditions while offering excellent tear resistance. With an ergonomic, seamless design, these gloves reduce hand fatigue and provide long-lasting comfort for demanding industrial tasks.

Technical Specifications

Knitting Gauge	13-gauge shell with 10-gauge acrylic liner
Material Composition	Acrylic, Eco-Latex
Cuff Style	Knit Wrist
