

13mm Hammer Drill for Wood, Metal, and Masonry

This 13mm hammer drill is a versatile power tool for drilling into wood, metal, and masonry. It delivers high-impact force for efficient drilling in tough materials.

Overview

Professional Grade Hammer Drill

This 13mm (1/2") hammer drill is engineered for versatility and power, making it an essential tool for drilling into wood, metal, and masonry. Equipped with a robust motor and high-impact hammer mechanism, it ensures efficient performance even in tough materials. The design features adjustable speed settings for precision, along with ergonomic handling to support extended professional use.

Technical Specifications

Chuck Capacity	13 mm
Compatible Materials	Wood, Metal, Masonry

Features

Key Features

- Robust motor with high-impact force
- Adjustable speed settings for precision
- Ergonomic design for comfortable handling
- Durable chuck for secure bit retention
- Integrated depth stop for consistent drilling
- Side handle for enhanced stability

Suitable For

Professional Tradespeople • DIY Enthusiasts
