Product Overview

Innovative Folding Design

These compact bolt cutters feature a patented folding mechanism that allows the tool to fold nearly in half, significantly improving portability without sacrificing cutting strength. Designed for professionals, the tool includes extra-wide rubber-coated handles that distribute pressure evenly to minimize hand fatigue during operation. Constructed from high-grade chrome molybdenum steel, these cutters are built to withstand harsh working conditions while maintaining precision.

Technical Specifications

Blade Material	Chrome Molybdenum Steel
Length	14 inch
Finish	Powder-coated

Performance Metrics

Max Cutting Capacity (Soft Material HRC 15)	7 mm
Max Cutting Capacity (Hard Material HRC 35)	5 mm

Features

Key Features	Foldable Design, Bi-material Handle, Rubber Grip, Drop-forged Cutting Head, Rust Resistant
