

14-Inch Grinding Wheel with 5-Inch Arbor

This grinding wheel has a 14-inch diameter, 1-inch thickness, and a 5-inch arbor hole. It is constructed with 39C80 abrasive grains for cutting efficiency and a smooth finish on a variety of materials.

Product Overview

High-Performance Grinding Solution

This 14-inch grinding wheel is engineered with black silicon carbide, making it an ideal choice for processing materials with low tensile strength. It delivers consistent performance across a wide range of applications, including gray cast iron, non-ferrous metals, and non-metallic surfaces. Designed for precision, it is also highly effective for working with glass, ceramics, refractories, and various silicate materials.

Technical Specifications

Diameter	14 inch
Arbor Hole	5 inch
Thickness	1 inch
Abrasive Material	Black Silicon Carbide
Grain Specification	39C80

Applications

Compatible Materials	Gray Cast Iron, Non-ferrous Metals, Non-metallic Materials, Stone, Ceramics, Glass, Refractories, Silicate Materials
