Product Overview

Versatile Thermoelectric Climate Control

The TK-14 is a portable thermoelectric cooler and warmer designed for flexibility across home, office, and automotive environments. With a 14-liter capacity and robust ABS construction, it offers both cooling and heating capabilities to suit various needs. Its dual-mode LED indicators ensure ease of use, making it an ideal companion for road trips, camping, and daily commutes.

Technical Performance

Performance Metrics

14 Liters

Capacity

22 °C

Max Cooling below Ambient

60 °C

Heating Capacity

Heating Control

Thermostat controlled (60±5°C)

Design and Utility

Indicators

- Green LED (Cooling mode)
- Red LED (Warming mode)

Ideal For

Office, Home, Car, Picnics, Camping

Material

ABS
