

14 x 1 x 5 inch Grinding Wheel

This grinding wheel measures 14 inches in diameter, 1 inch in thickness, and has a 5-inch arbor hole. It is constructed with 39C80 abrasive grains, offering exceptional cutting efficiency and durability for grinding applications.

Product Overview

High-Performance Grinding Wheel

This 14-inch grinding wheel is engineered with black silicon carbide, making it an ideal choice for processing materials with low tensile strength. It delivers efficient material removal and consistent surface finishing across a variety of challenging substrates, including non-ferrous metals, ceramics, and glass. Designed for professional applications, this wheel ensures reliability and performance in demanding industrial environments.

Technical Dimensions

| | |
|-----------------|---------|
| Diameter | 14 inch |
| Thickness | 1 inch |
| Arbor Hole Size | 5 inch |

Material & Application

Compatible Materials

- Gray cast iron
- Non-ferrous metals
- Stone
- Ceramics
- Glass
- Refractories
- Silicate materials

| | |
|----------------------|--|
| Abrasive Material | Black Silicon Carbide |
| Material Suitability | Low Tensile Strength, Non-metallic, Silicate-based |
