Overview

Professional Turbo Air Fryer Oven

This 14.5L high-capacity air fryer oven is designed for efficient, professional-grade cooking in household environments. Featuring a dual heating system with top and bottom elements, it cooks 20% faster than traditional methods while offering 16 versatile preset modes for everything from air frying and dehydrating to baking and roasting. The unit combines safety and durability with a stainless steel housing, double-tempered glass door, and a unique 30-degree stop opening mechanism to prevent hot air shock.
