

14V 50A Automotive Alternator

This 14V 50A alternator is designed for automotive applications. It features a 1V pulley and a three-hole hangfoot design with a 77.5mm hangfoot distance.

Overview

High-Performance 14V 50A Automotive Alternator

This 14V 50A automotive generator, model JFZ155, is engineered to provide reliable power output for vehicle electrical systems. Designed with a standard 1V pulley configuration and a robust three-hole hangfoot mounting system, it offers compatibility with various automotive applications. With a precise hangfoot distance of 77.5mm, this unit is built for secure installation and consistent performance.

Technical Specifications

Rated Voltage	14 V
Rated Current	50 A
Pulley Type	1V
OEM Reference	0120489710

Mounting Details

Hangfoot Configuration	Three-hole
Hangfoot Distance	77.5 mm
