

14x51mm 500V Cylindrical Fuse Holder

This fuse holder is designed for 14x51mm fuses with a 500V rating. It complies with IEC60269 standards, ensuring reliable protection in electrical circuits.

Product Overview

Professional Circuit Protection

This cylindrical fuse holder is engineered for 14x51mm fuses and is rated for operation up to 500V. Built to international standards, it provides reliable overcurrent protection for diverse industrial electrical circuit applications. Its robust design ensures ease of installation and long-term durability in professional settings.

Technical Specifications

Rated Voltage

500 V

Rated Voltage

Fuse Compatibility

14x51mm

Compliance

IEC60269, CE

Model Series

RT18-63X
