

1.5-3.5T Internal Combustion Tractor

This internal combustion tractor has a capacity of 1.5 to 3.5 tons. It is designed for heavy-duty material handling applications and features a robust chassis and powerful engine.

Overview

High-Performance Industrial Tractor

This 1.5-3.5T internal combustion tractor is engineered for robust material handling in demanding industrial environments. It features a streamlined, high-strength frame design paired with an ergonomic driving room for enhanced operator comfort and efficiency. With versatile engine options including diesel, gasoline, and LPG, this unit provides reliable power and energy efficiency for diverse operational requirements.

Technical Specifications

Key Design Features

Streamlined Exterior • High-Strength Frame • Transverse Steering Axle • Overhead Intake System • Integral Hood

Operator Comfort & Safety

- Comfortable driving room
- Mini steering wheel
- Reliable special designed instrument
- Heat insulation and noise reduction

Power Options

Diesel, Gasoline, LPG
