Product Overview

High-Efficiency Compactor Plate

This hydraulic compactor plate is engineered for 1.5-3 ton excavators, providing a robust solution for soil compaction tasks. Featuring a smooth wear plate on the bottom, it utilizes the excavator's hydraulic system to deliver powerful vibration and pressure. It is an ideal attachment for foundation backfill, road maintenance, and trench compaction, ensuring high efficiency across various soil types including sand, clay, and soft stone.

Technical Specifications

Compatible Carrier Weight

1.5 T

Min Carrier Weight

3 T

Max Carrier Weight

Compatible Materials

- Sand
- Soft Stone
- Hard Soil
- Clay

Primary Applications

Trench Compaction, Foundation Preparation, Road Maintenance, Landscaping, Backfill

Design & Construction

Key Design Features

Smooth Wear Plate • Heavy-Duty Steel Construction • Corrosion Resistant Coating • Quick-Connect Fittings

Included Components

- Hydraulic Motor
- Hydraulic Hoses
- Top Mounting Bracket
- Lifting Points
