

15 HP Gasoline Engine

This gasoline engine features a robust design and efficient performance. It is suitable for a variety of applications.

Product Overview

High-Performance 15HP Gasoline Engine

This 15HP gasoline engine, model DK190F, is engineered for robust performance and reliable operation across a wide range of industrial and commercial applications. Built with durability in mind, it features an easy-start system designed to ensure consistent power output and longevity. Ideal for demanding tasks, this engine provides the efficiency required for professional-grade machinery.

Maintenance

Air Cleaner Care

To ensure engine longevity, clean the air cleaner element regularly using warm water and mild detergent. Rinse thoroughly and allow to dry completely before re-installing. For optimal performance, saturate the element with engine oil before installation. Operating with a dirty, damaged, or improperly installed air cleaner will cause premature engine wear and damage.
