

1.5 HP Portable Air Compressor

This 1.5 HP air compressor is designed for a variety of inflation and powering tasks. It features a durable tank for storing compressed air, a pressure gauge for monitoring air pressure, and a regulator for adjusting output pressure.

Product Overview

Compact and Reliable Performance

This 1.5 HP portable air compressor is engineered for versatility, making it an ideal choice for various inflation and pneumatic powering tasks. It features a robust 24-liter tank for consistent air storage and is built for mobility with an integrated handle and wheels. Designed with a durable motor and pump assembly, it provides reliable performance for professional and workshop environments.

Technical Performance

Power Output

1.5 HP

Horsepower

165 L/MIN

Air Displacement

Max Working Pressure

8 Bar

Motor Speed

2850 RPM

Physical Specifications

Tank Capacity

24 L

Electrical Specifications

Electrical Requirements

- 220 V
- 60 HZ
- Single Phase

Construction

Motor Winding Material

Aluminium wire

Key Features

Portable, Pressure Gauge, Pressure Regulator, Wheels Included
