

1.5-Ton Capacity Electric Forklift with Three-Pivot Design

This electric forklift is designed for material handling in industrial and commercial settings. Its three-pivot design enhances maneuverability, making it suitable for lifting and transporting loads up to 1.5 tons.

Overview

High-Efficiency Material Handling

This electric forklift is engineered for superior maneuverability in confined industrial spaces, thanks to its specialized three-pivot design. With a robust 1.5-ton lifting capacity, it is optimized for both indoor and outdoor material handling tasks. The unit is built with enhanced durability, including resistance to water damage, ensuring consistent reliability in demanding operational environments.

Performance

Load Capacity	1.5 tons
---------------	----------

Design & Features

Steering Configuration	Three-pivot design
Durability Features	Water-resistant, Indoor/Outdoor capable

Safety

Safety Standards	Yes
