

1.5 Ton Diesel Forklift Truck

This diesel-powered forklift is designed for material handling in industrial environments. It has a 1.5 ton lifting capacity, a high-strength mast, and durable tires for stable operation.

Overview

Robust Diesel Forklift for Industrial Use

The 1.5 Ton Diesel Forklift Truck is a reliable material handling solution engineered for demanding industrial environments. It features a high-strength mast for stable lifting and an ergonomic operator cabin designed to enhance comfort and productivity during long shifts. With its powerful diesel engine and durable tires, this forklift is built to perform consistently across warehousing, construction, and logistics applications.
