Product Overview

High-Performance Shade Netting

This 150 GSM knitted shade net is engineered from virgin HDPE with UV stabilization, making it an ideal solution for agricultural, horticultural, and domestic shading needs. The mono-tape construction ensures superior tear resistance and durability, effectively reducing light intensity and regulating temperatures in outdoor spaces. Designed for longevity, this net provides a reliable barrier against excessive sunlight for car parks, gardens, and farms.

Technical Specifications

Material	Virgin HDPE with UV stabilizer
Weight	150 GSM
Construction	Mono+tape

Dimensions & Logistics

Width	0-8 meters
Length	0-500 meters

Appearance

Available Colors	Dark Green, Black
------------------	-------------------

Packaging & Delivery

Packaging Standard

- One roll per polybag
- Customer label available
- Customizable packing options

Port of Loading

Shanghai, China
