Overview

High-Performance Agricultural Tractor

This 150 HP wheel tractor is engineered for dry land and multifunctional agricultural applications, utilizing advanced European technology for reliable performance. It features a robust chassis, a synchronized 16F+8R transmission for smooth operation, and a high-capacity hydraulic system capable of handling demanding implements. Designed with operator comfort and durability in mind, this machine integrates high-quality global components to ensure efficiency in diverse farming operations.

Technical Specifications

Transmission	Synchronizer 16F+8R
Max Lifting Force	40 KN
PTO Rotation Speeds	540 RPM, 720 RPM, 850 RPM, 1000 RPM
Fuel Tank Capacity	350 L

Equipment & Features

Standard Equipment

- Four-way hydraulic output
- Category III three-point hitch
- Strengthened chassis and rear axle
- Rotational moulding fuel tank

Optional Upgrades

Category II Hitch • Electronic Wet-type PTO • Internal/External Air Filter • Cut-off Air Brake • Upper Exhaust

Compliance

Certifications

Euro II Emission Standard, OECD, EAC, E-mark
