

1500V Flame Retardant Electrical Insulation Tape

This insulation tape offers 1500V insulation and is made from flame retardant material. It is suitable for a variety of electrical wiring and cable insulation tasks.

Product Overview

Professional Electrical Insulation Tape

This high-performance insulation tape is engineered for demanding electrical applications, offering a robust insulation voltage rating of up to 1500V. Designed with flame-retardant materials, it ensures safety and reliability in various wiring and cable management tasks. Its flexible design and wide range of available colors make it an essential tool for organized and secure electrical installations.

Technical Specifications

Insulation Voltage

1500 V

Max Voltage

Safety Rating

Flame Retardant

Dimensions & Variants

Thickness

- 0.13mm
- 0.15mm

Width

- 15mm
- 19mm

Available Lengths

- 5m
- 10m
- 20m
- 10 yards
- 20 yards
