

1500W DC to AC Power Inverter

This 1500W power inverter converts 12VDC to 220VAC at 50Hz, delivering a modified sine wave output. It is equipped with a USB 5VDC/2A port for device charging.

Overview

Reliable Power Conversion

This 1500W power inverter is designed to efficiently convert 12VDC power into 220VAC, providing a reliable modified sine wave output at 50Hz. Engineered for versatility, it is an ideal solution for powering electronics in vehicles, boats, and off-grid setups, or for providing emergency power backup. With an integrated USB port, it also offers convenient charging capabilities for mobile devices.

Performance Metrics

Rated Power

1500 W

Power Output

Input Voltage	12VDC
Output Voltage	220VAC
Output Frequency	50 Hz

Features

Waveform Type

Modified Sine Wave

USB Output	5VDC / 2A
------------	-----------

Applications

Ideal Use Cases

- Vehicle power systems
- Marine / Boat electronics
- Off-grid power
- Emergency power backup
