

1500W Glass Jar Blender with Dispensing Tap

This blender features a 1500W high-performance copper motor with overheat protection. It includes a 1500ml glass jar, a stainless steel base, and a 2-speed adjustment switch.

Product Overview

High-Performance Blending Solution

This 1500W high-performance blender is engineered for both commercial and home environments, offering robust power and durability. The unit features a specialized glass jar with a ribbed design to optimize blending efficiency and consistency. Designed for convenience, it includes an integrated dispensing tap, allowing for easy and mess-free serving directly from the jar.

Technical Specifications

Power Output

1500 W
Power

Speed Control

Variable speed control via rotary dial
