

1500W Modified Sine Wave Power Inverter

This 1500W modified sine wave power inverter converts DC power from 12V, 24V, or 48V sources into standard AC power. It features dual AC outlets and cooling vents for thermal management.

Overview

Reliable Power Conversion

This modified sine wave power inverter is engineered to efficiently convert DC power from 12V, 24V, or 48V sources into reliable AC power. Designed for versatility, it is an ideal solution for off-grid applications, renewable energy systems, and mobile power needs in vehicles or boats. The unit features built-in thermal management and safety protection mechanisms to ensure consistent operation for your electronic devices.

Technical Specifications

Continuous Power

1500 W

Rated Power Output

Compatible DC Inputs

12V, 24V, 48V

Waveform Type

Modified Sine Wave

Features

Protection Mechanisms

- Built-in thermal management
- Cooling fan
- Power status indicator
- Fault alert indicator
- Protective AC socket covers

Output Ports

2 AC Outlets
