

1500W Monoblock Class D Car Amplifier

This monoblock Class D car amplifier provides substantial power to subwoofer systems. Its efficient Class D circuitry minimizes heat and maximizes power output.

Product Overview

High-Performance Monoblock Class D Amplifier

This 1500W Monoblock Class D car amplifier is engineered to deliver substantial power and clean audio to high-demand subwoofer systems. Featuring a high-efficiency Class D design, it minimizes heat generation while maximizing output, making it ideal for car audio enthusiasts seeking deep, impactful bass. The robust all-metal panel construction ensures durability and efficient heat dissipation for long-term reliability in various vehicle configurations.

Performance Metrics

Power Performance

1500 W

Maximum Power

500 W

RMS Power (1-Channel)

Amplifier Class

Class D

Audio Tuning & Controls

Low Pass Filter Range	24Hz - 250Hz
Subsonic Filter Range	10Hz - 55Hz
Bass Boost	0dB - 12dB
Phase Adjustment	0° to 180°

Connectivity & Integration

Interface Configuration

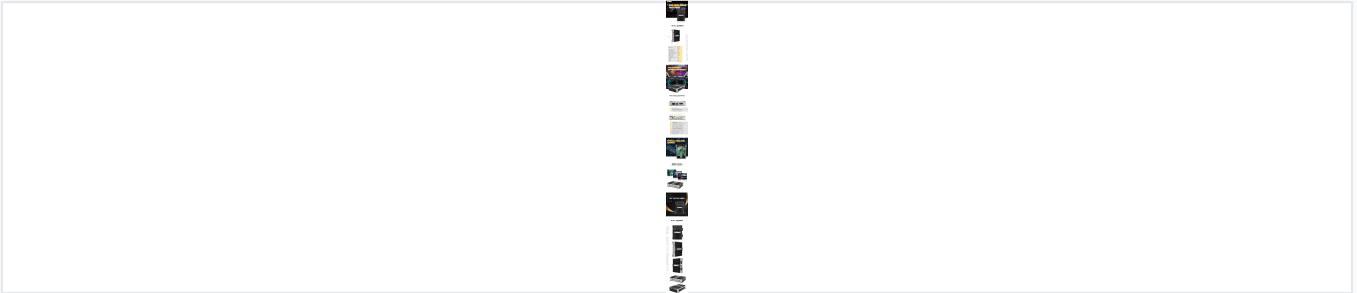

- Master/Slave configuration support
- Slave In / Master Out ports
- L/R RCA Inputs
- Remote level control port

Protection & Reliability

Safety Features

Short Circuit Protection, Overload Protection, Thermal Overload Protection, Fuse Protection

Physical Construction

The amplifier features a durable all-metal panel for heat dissipation and an organized internal structure for reliable power delivery.

Status Indicators

- Power Indicator LED
- Protect Mode LED

Chassis Material

All-metal panel with wire drawing finish
