Overview

Heavy-Duty Cargo Solution

This 150CC gasoline-powered cargo tricycle is engineered for reliable and efficient transportation in commercial and industrial settings. Featuring a robust 40*80 keel chassis and a 150cc air-cooled engine, it provides a stable platform for heavy hauling. With EEC certification, this vehicle ensures compliance with essential safety and performance standards for professional use.

Engine & Performance

Engine Displacement	150 cc
Engine Type	1 cylinder, 4 stroke, air cooled
Starter System	Electric, Kick
Ignition Type	C.D.I
Transmission	5 forward + 1 reverse

Chassis & Suspension

Chassis Specification	40*80 keel and 40*80 chassis
Front Suspension	Dragon front shock, #50
Rear Suspension	Steel plates, 8+2 thickness
Rear Axle	5 bolts full floating, 180mm

Capacity & Dimensions

Load Capacity

800 kg

Max Load Capacity

Cargo Box Dimensions

1.8m x 1.3m

Tire Size

5.00-12 (Front/Rear)

Electrical & Certification

Certifications

EEC Certified

Battery

9A
