Overview

Reliable Utility Transport

This 150cc gasoline-powered utility tricycle is engineered for efficient cargo transportation in demanding environments. Featuring a robust chassis and a large 1700x1200mm cargo bed, it offers high load capacity and stable handling. With electric and kick-start options, along with a reliable shaft drive transmission, it is a practical solution for logistics and hauling needs.

Engine & Performance

Engine Specifications

150 cc

Displacement

60 km/h

Normal Speed

3.5 L/100km

Fuel Consumption

Transmission

Shaft drive with 5 forward speeds and 1 reverse speed

Ignition & Starting

CDI Ignition, Electric Start, Kick Start

Dimensions & Capacity

Cargo Box Dimensions

1700 x 1200 mm

Load Capacity

1000 kg

Gross Vehicle Weight

350 kg

Technical Details

Braking System

Position	Type
Front	Disc
Rear	Drum

Fuel Tank Capacity 13 L

Tire Specification 4.50-12
