

150cc Off-Road Motorcycle

The 150cc off-road motorcycle is designed for rugged terrain and adventurous riding. It features a robust engine, durable frame, and high-performance suspension to deliver reliable performance on various off-road surfaces.

Overview

Rugged Off-Road Performance

This 150cc off-road motorcycle features a streamlined design with dynamic aesthetics and a durable, lightweight construction. Engineered for versatility, it includes a reinforced rear fork and high-quality tires, making it suitable for long-distance riding and harsh terrain. With optimized systems for braking, filtration, and fuel efficiency, it provides a reliable and safe experience even in challenging environments like high plateaus and cold regions.

Performance & Engine

Engine Displacement

150 cc

Displacement

Performance Capabilities

High Plateau Adaptation, Cold Area Optimization, Instantaneous Power

Chassis & Design

Chassis Construction

- Reinforced square rear fork
- Lightweight, corrosion-resistant fuel tank
- Optimized chain case
- 9-class chromed outer parts

Ground Clearance

270 mm

Safety & Reliability

Safety Additions

- Additional insulation board
- Anti-hot body care box
- High-quality, long-life tires

Braking System

Optimized disc brake system
