

150kW Diesel Power Generator

This 150kW diesel generator is engineered to provide a reliable power solution for various applications. It is designed to offer exceptional performance and durability for both prime and standby power needs.

Overview

Reliable Industrial Power Generation

This 150kW diesel generator is engineered for high-performance, long-term reliability in demanding industrial and commercial environments. Featuring an advanced electronic governor and a sound-attenuated enclosure, it delivers stable power output with minimal operational noise and reduced fuel consumption. Designed for seamless integration, the system includes automatic protection functions and rapid frequency recovery to ensure consistent performance under variable load conditions.

Performance Specifications

Rated Power Output

150 kW

Output Power

Control & Protection

- Automatic Transfer Switch (ATS) capability
- Electronic governor for precise speed control
- High cooling water temperature alarm
- Low oil pressure protection
- Overspeed alarm and automatic stop

Standards & Compliance

Certifications

ISO 9001:2015 • CE • EPA

International Standards Compliance

ISO 3046, ISO 4001, ISO 8525, IEC 34-1, GB/T 2820, VDE 0530

Technical Components

Control System Components

Component	Specification
Current Controller	160A / 4P
Speed Controller	C2002
Enclosure Type	Super Silent
