

150L Bearing Water Tank for Plumbing Applications

This 150L bearing water tank is designed for efficient water storage and heating. Its durable construction makes it suitable for residential and commercial plumbing applications, providing a reliable hot water solution.

Overview

Reliable Water Storage Solution

This 150L bearing water tank is engineered for efficient water storage and heating in diverse plumbing environments. Featuring a durable construction, it is designed to withstand regular use while maintaining structural integrity. The integrated bearing design promotes smooth operation and extended service life, making it a dependable choice for both residential and commercial hot water systems.

Technical Specifications

Key Design Features

- Bearing design for smooth operation
- Durable construction
- Optimized for heating applications

Capacity	150 L
Suitable Applications	Residential, Commercial, Plumbing Systems, Hot Water Storage
