

# 150lb Swing Check Valve

This swing check valve is designed to prevent backflow in piping systems. Rated for 150lb pressure, the valve allows flow in one direction and automatically closes if the flow reverses.

## Product Overview

### Industrial Swing Check Valve

This API-compliant swing check valve is engineered to provide reliable backflow prevention in demanding piping systems. Rated for 150lb pressure, the valve automatically closes upon flow reversal, ensuring system integrity and operational safety. Its robust construction makes it an ideal solution for various industrial applications requiring consistent performance and ease of maintenance.

## Technical Specifications

### Pressure Rating

**150 lb**

Pressure Class

Valve Type	Swing Check Valve
Compliance Standards	API
Body Material	WCB (Cast Carbon Steel)
Connection Type	Flanged

## Key Features

### Key Features

- Automatic backflow prevention
- Robust industrial design
- Easy installation and maintenance
- High operational efficiency
