

# 150mm Circular Saw Blade for Woodworking

This circular saw blade is designed for precision cutting. It features durable construction and sharp teeth for efficient performance in woodworking.

## Product Overview

### Precision Woodworking Performance

This 150mm circular saw blade is engineered for high-precision cutting tasks in woodworking applications. Designed with durable construction and sharp, efficient teeth, it ensures clean cuts and reliable performance. Its robust build makes it an ideal choice for professional-grade cutting projects requiring accuracy and longevity.

## Technical Specifications

Blade Diameter	150 mm
Blade Thickness	4 mm
Bore Size	32 mm

## Application & Usage

### Key Features

High Precision • Durable Construction • Sharp Teeth

Primary Material Compatibility	Wood
