Overview

High-Efficiency Portable Cooling

This 15L portable DC compressor car fridge is designed for professional and recreational use in vehicles, including cars, trucks, and RVs. It features a high-performance compressor system capable of reaching temperatures as low as -18°C , ensuring reliable freezing and cooling on the go. With its compact footprint and energy-saving operation, it provides an ideal solution for road trips, camping, and outdoor activities where space and power efficiency are critical.
