

16 Gauge Primary Wire - Automotive Grade

This 16-gauge primary wire is designed for automotive and general-purpose electrical wiring. It features a stranded copper conductor and PVC insulation, offering flexibility and conductivity.

Overview

Automotive Grade Primary Wire

This 16-gauge primary wire is a versatile, general-purpose solution designed for automotive, marine, and industrial low-voltage applications. Featuring a high-quality PVC jacket, it offers superior resistance to grease, oil, and acid, ensuring durability in demanding environments. The stranded copper construction provides excellent flexibility and efficient conductivity for reliable point-to-point wiring.

Technical Specifications

Wire Gauge	16 AWG
Voltage Rating	60 V
Operating Temperature	-40°C to 90°C
Compliance Standards	SAE J1128

Physical Properties

Available Colors

Red • Black • Blue • Yellow • White • Green

Insulation Material	PVC
Conductor Type	Stranded Copper

Applications

Common Applications

- Automotive wiring
- Truck and trailer wiring
- Marine electrical systems
- Point-to-point low voltage circuits
- Wiring harnesses
- Lighting circuits
