

16 in. Metal Cutting Wheel

This 16-inch cutting wheel is designed for cutting metal. It features a T41 large flat wheel design for optimal performance.

Product Overview

High-Performance Metal Cutting

This 16-inch cutting wheel is engineered for superior performance when cutting through metal, steel, and various alloys. Designed for industrial applications, it features a durable construction that balances cutting speed with a long service life. The wheel complies with international safety standards, ensuring reliability and consistency for professional metalworking tasks.

Technical Specifications

REINFORCED CUTTING DISCS

FAST CUTTING ACTION AND LONG SERVICE LIFE.

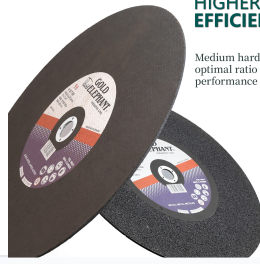

Φ16" (400mm)

Reinforced cutting disc designed for fast cutting action and long service life.

Dimensions	400 x 3.0 x 25.4 mm
Wheel Type	T41 (Flat)
Maximum Operating Speed	80 m/s
Maximum RPM	3800 RPM

Compliance & Quality

HIGHER CUTTING EFFICIENCY

Medium hard bond. For optimal ratio between cutting performance and disc life.

Optimized for a medium-hard bond, providing an ideal ratio between cutting performance and disc durability.

Certifications

ISO 9001, MPA Z-04888, EN 12413

Applications

Suitable Materials

Steel • Metal • Alloys
