

16-Inch Kids' Balance Bike with Training Wheels

This child's bicycle is designed for young riders learning to balance. It features a lightweight frame and 16-inch wheels with training wheels for added stability.

Product Overview

Designed for Young Riders

This 16-inch balance bike is specifically engineered to help children develop confidence and coordination while learning to ride. Featuring a lightweight, step-through frame, it allows for easy mounting and dismounting, while the included training wheels provide essential stability for beginners. With safety-focused features like a chain guard and ergonomic handlebar grips, this bike is the perfect choice for a safe and enjoyable introduction to cycling.
