

16-Row Wheat Seeder for Efficient Grain Sowing

This one-way disc plough is suitable for ploughing cultivated land and virgin land, especially for green manure fields with stubble. It tills soil effectively to satisfy agricultural needs, offering less working resistance and easy operation.

Overview

High-Efficiency Wheat Seeder

The 2BFX-16 Wheat Seeder is a robust agricultural machine engineered for the precise and efficient sowing of wheat and similar grains. Featuring a 16-row configuration, it ensures optimal seed distribution and consistent delivery through a reliable metering mechanism. Built with a heavy-duty frame and adjustable depth control, this seeder is designed to adapt to diverse soil conditions, making it an essential tool for maximizing productivity and crop yield.

Technical Specifications

Row Configuration	16 rows
Depth Control	Yes
Opener Type	Sturdy disc openers
Attachment Method	Tractor attachment

Key Features

Performance Highlights

16 rows

Sowing Rows

Key Features

- 16-row high-efficiency configuration
- Reliable seed metering mechanism
- Adjustable depth control
- Durable disc openers
- Heavy-duty frame construction
