

16-Slot 2U Cable Management Organizer

This 16-slot, 2U metal cable management organizer is designed to streamline and protect network cables within server racks and enclosures. Constructed from durable metal, this unit provides a robust solution for managing and routing cables, preventing tangling and ensuring optimal airflow.

Product Overview

Professional Cable Infrastructure

This 16-slot 2U metal cable management organizer is designed to streamline and protect network cables within server racks and enclosures. By facilitating smooth, parallel cable entry, it helps maintain a clean, standardized, and professional appearance inside server cabinets. Its robust construction ensures long-term durability, making it an ideal choice for data centers, server rooms, and critical network installations.

Technical Details

Rack Height	2 U
Slot Capacity	16
