Product Overview

High-Performance Synthetic Rope

This 16-strand braided synthetic rope is engineered for reliability in demanding environments. Its robust construction offers superior abrasion resistance and high load-bearing capacity, making it an essential tool for marine, industrial, and general-purpose applications. Designed for flexibility and ease of handling, this versatile rope is suitable for both indoor and outdoor tasks.

Technical Specifications

Construction	16-Strand Braided
Material	Synthetic Fibers
Key Features	Abrasion Resistant, High Strength, Flexible, Durable

Usage & Applications

Primary Applications

- Marine Applications
- Industrial Use
- General Purpose
- Crafting Projects
- DIY Projects

Environment Suitability

Indoor • Outdoor

Options

Available Colors	Red, White, Multi-color
