

160 HP Standard Bulldozer

This hydraulic drive series bulldozer meets emission standards and features strong power and high productivity. It is applicable for bulldozing, digging, landfill, and other bulk material operations on roads, railways, mines, and airports.

ADDITIONAL IMAGES

Product Overview

A robust 160 HP bulldozer designed for demanding earthmoving and site preparation tasks.

High-Performance Bulldozer

This 160 HP hydraulic drive bulldozer is designed to excel in severe working conditions across road, railway, mining, and airport projects. It features an advanced mechanical design that balances high productivity with easy maintenance requirements. The machine integrates a robust power system and a comfortable, ergonomic operator cab to ensure efficiency and safety during demanding earthmoving and landfill operations.

Technical Specifications

Rated Power

160 HP

Engine Power

Emission Compliance

National III • China-III

Engine Model

Weichai WD10G178E355

Design Features

Transmission System	Planetary power shift with forced lubrication
Suspension Structure	Swing type balance beam with splayed beam

Operational Comfort

Operator Environment

- Hexahedral cabin design
- Wide visual field
- High-power A/C system
- Sealed structure for noise and dust reduction

Compliance & Quality

Quality Standards	ISO 9001, CCC, CQC
