Product Overview

Versatile Portable Power Solution

This 167Wh portable power station provides a reliable energy source for various appliances and devices. Featuring multiple charging inputs including AC, solar, and 12V car adapters, it ensures you stay powered up wherever you go. With a compact, lightweight design and modified sine wave output, it is an ideal energy companion for professional and outdoor use.

Technical Specifications

Key Power Metrics

167 Wh Capacity	150 W AC Output	250 W Peak Power
---------------------------	---------------------------	----------------------------

Battery and Physical Specs

Attribute	Specification
Battery Type	Lithium-ion
Capacity (mAh)	45000mAh (3.7V)
Weight	1.6 kg
Dimensions	196 x 108 x 126 mm

Charging Inputs

- AC Outlet
- Solar Panel
- 12V Cigarette Lighter

Operating Conditions

-10 to 40 Operating Temp, 10 to 40 Optimal Charging

Output Ports

Output Capabilities

Port Type	Rating
AC Output	110V, 150W (250W Peak)
DC Output	9-12.6V/10A, 120W Max
USB Output	5V/3.1A Max
