

16GB DDR4 2666MHz SO-DIMM RAM Module

This DDR4 2666MHz SO-DIMM memory module has a capacity of 16GB. It is designed for laptops and small form factor computers where space is limited.

Overview

High-Performance Memory Upgrade

This 16GB DDR4 SO-DIMM memory module is engineered to enhance system speed and efficiency for laptops and small form factor computers. Operating at a stable frequency of 2666MHz, it provides the necessary throughput for demanding tasks like content creation, gaming, and multitasking. The compact design ensures compatibility with space-constrained systems while maintaining reliable performance.

Technical Specifications

Capacity	16 GB
Memory Type	DDR4 SO-DIMM
Frequency	2666 MHz

Features

Key Features	Gold-plated connectors, Enhanced Multitasking, Compact Form Factor, CE Certified
--------------	--

Compliance

Manufacturing Origin	China
