

16mm Mushroom Reset Emergency Push Button Switch

This 16mm mushroom reset button is an emergency stop push button switch. It features a 16mm mounting diameter and is available in multiple colors.

Product Overview

Specializing in production of buttons and indicators since 1997

Red mushroom actuator for emergency stop applications.

Industrial Emergency Reset Button

The XDL16-11M is a high-performance 16mm mushroom-head push button switch engineered for critical control circuits and emergency stop applications. Constructed with zinc alloy and high-grade anti-flam materials, it features silver alloy contacts to minimize electrical erosion and ensure long-term reliability. This versatile series is compliant with international standards, making it an ideal choice for distribution cabinets, machinery control panels, and communication networks.
