

16mm SMT Component Feeder

This 16mm feeder is designed for SMT pick-and-place machines to ensure reliable and accurate component placement. It is constructed with high-quality materials for durability and consistent performance.

Product Overview

Precision 16mm SMT Component Feeder

This 16mm SMT component feeder is a precision-engineered solution designed to optimize the efficiency of automated surface mount technology assembly lines. Built for durability and consistent performance, it ensures reliable and accurate component placement during high-volume PCB assembly. Its design allows for seamless integration with various SMT machines, minimizing downtime and supporting a wide range of component types within the 16mm specification.

Technical Specifications

Feeder Width	16 mm
Compatible Series	2000 Series, 2050 Series, 2060 Series, 750 Series

Logistics

Standard Delivery Time	3-5 working days
