

16mm Tape Feeder for Pick and Place Machines

This 16mm tape feeder is designed for use in pick and place machines. It facilitates the precise delivery of 16mm components for automated assembly processes.

Product Overview

Precision 16mm Tape Feeder

This 16mm tape feeder is engineered for high-precision component delivery in automated pick and place assembly lines. Designed to ensure consistent and reliable feeding, it enhances the overall efficiency and accuracy of the electronic manufacturing process. This unit is compatible with standard tape-fed component systems, making it an essential upgrade for maintaining high-speed production standards.

Technical Specifications

Tape Width	16 mm
Application	Pick and Place Machines

Compatibility

Supported Tape Widths

- 8mm
- 12mm
- 16mm
- 24mm
- 32mm
- 44mm
- 56mm
- 72mm

Compatible Series	CTF, NF, FF, CF, ATF
