

# 16mm<sup>2</sup> Welding Cable Set with Electrode Holder and Ground Clamp

This is a 16mm<sup>2</sup> welding cable set designed for reliable welding operations. It includes durable welding leads with an electrode holder and ground clamp for secure connections and optimal conductivity.

## ADDITIONAL IMAGES

## Product Overview

### Professional Welding Cable Set

This 16mm<sup>2</sup> welding cable set is engineered for reliability and consistent performance in demanding industrial environments. The set features a 3.0-meter cable length and a high-current capacity of 220AMP, making it suitable for a variety of heavy-duty welding tasks. With excellent flexibility even in cold temperatures and high resistance to environmental factors like oil and gas, this cable ensures ease of use and long-term durability for professional operators.

## Technical Specifications

Conductor Material	CCA
Cross Section Area	16 mm <sup>2</sup>
Cable Diameter	9 mm
Cable Length	3 m

## Performance

### Rated Current

**220 AMP**  
Rated Current

Cold Weather Flexibility	Flexible down to -25°C
--------------------------	------------------------

## Features

Resistant to  
Oil • Gas • Acid

### Certifications

GS

### Battery Post Compatibility

Fits Top and Side Mount

## In the Box

### Components

- Welding Cable
- Electrode Holder
- Ground Clamp
