

16V 20Ah Electric Scooter Gel Battery

This 16V 20Ah gel battery provides reliable power for electric scooters and bicycles. It features a robust construction and advanced gel electrolyte technology for safe operation and long life.

Overview

High-Performance Gel Battery

The 16V 20Ah Electric Scooter Gel Battery (8-DZM-20) is engineered for reliability and longevity in electric vehicles. Featuring advanced Nano-Gel technology and a high-tin alloy grid, this battery offers excellent charge acceptance, low self-discharge rates, and high resistance to vibration. Its robust design ensures safe, leak-free operation, making it a dependable power source for electric scooters and bicycles.

Technical Specifications

Rated Voltage	16 V
Rated Capacity	20 Ah
Model	8-DZM-20
Cycle Life	350 cycles

Key Features

Key Advantages

- Advanced Nano-Gel technology
- Low self-discharge for longer storage life
- High anti-vibration capability
- Leak-free design
- Copper core deep-thread terminals for durable connections

Environmental Compliance	100% Recyclable, Cadmium-Free, Toxic-Metal-Free
