

17 1/2" Steel Body PDC Bit

This 17 1/2" steel body PDC bit is a high-performance drilling tool. It features a robust steel body and strategically placed PDC cutters for optimized cutting.

Product Overview

High-Performance Drilling Solution

The 17 1/2" steel body PDC bit is engineered for demanding oil and gas drilling operations. Featuring a robust steel construction, this tool offers superior durability and consistent performance in challenging geological formations. Its optimized cutter placement is designed to maximize the rate of penetration (ROP) and enhance overall drilling efficiency.

Technical Specifications

Bit Size	17.5 inch
Body Material	Steel
Model	HPS5319DT

Compliance & Standards

Certifications	ISO
