

176L Two-Door Direct Cooling Refrigerator

This refrigerator features a two-door design and direct cooling. It has a total effective volume of 176L and a mechanical temperature controller.

Overview

Compact Two-Door Cooling Solution

The 176L Two-Door Direct Cooling Refrigerator offers a balanced storage solution for food and beverages. Designed with an efficient direct cooling system and a mechanical temperature controller, it ensures consistent performance for daily needs. With its dual-chamber configuration and energy-conscious operation, this unit is an ideal choice for professional or household environments requiring reliable, compact refrigeration.

Capacity & Dimensions

Total Effective Volume	176 L
Freezer Volume	110 L
Refrigerator Volume	66 L

Performance

Freezing Capacity

5 kg/24h

Freezing Capacity

Daily Power Consumption	0.37 kW·h/24h
